

RFID Tag

This RFID Tag features a highly sensitive Radio Frequency Identification (RFID) inlay for item-level visibility and inventory management. The RFID technology enables tens of thousands of commodity categories, prices, origin, batches, shelves, inventory, sales and other links to be well managed. It helps retailers better calculate their hot-selling products.

Retailer Values

- // Enables near real-time merchandise visibility
- //Improving sales by promoting open merchandising
- // RFID element offers an efficient way to track inventory
- //Reducing waste through recycling used tags for reapplication, consistent with green concepts
- //Easy application and removal to help improve store operations
